016055	Employability Skills*	4	-	-	4	25	-	50	2.5	-	-	75	1
Total		28	-	20	48	150	125	450	-	275	-	1000	35

General Proficiency will comprise of various co-curricular activities like games, hobby clubs, seminars, declamation contests, extension lectures, NCC, NSS and cultural activities, elementary mathematics, GS & G.K etc.

+ Industrial visit compulsory to minimum 2 Industry or Department.

Note: 1- Each period will be of 50 minutes. 2- Each session will be of 16 weeks. 3- Effective teaching will be at least 12.5 weeks.

Branch Code - 02

The page features four horizontal wavy bands. The top and bottom bands are composed of a light gray outer layer and a dark gray inner layer. The middle two bands are solid dark gray. The text is centered between the second and third bands.

**SIXTH SEMESTER
CIVIL ENGINEERING**

STEEL STRUCTURE DESIGN

Subject Code : 026003

L	T	P
6	-	-

RATIONALE

This subject is an applied engineering subject. Diploma holders in Civil Engineering will be required to supervise steel construction and fabrication. He may also be required to design simple structural elements, make changes in design depending upon availability of materials. This subject thus deals with elementary design principles as per BIS code of practice IS: 800

DETAILED CONTENTS

THEORY

1. Structural Steel and Sections: (03 periods)

- 1.1 Properties of structural steel as per IS Code
- 1.2 Designation of structural steel sections as per IS handbook and IS: 800-2007

2. Riveted Connections (11 periods)

Types of rivets, permissible stresses in rivets, types of riveted joints, specifications for riveted joints as per IS 800. Failure of a riveted joint. Assumptions in the theory of riveted joints. Strength and efficiency of a riveted joint. Design of riveted joints for axially loaded members.

3. Welded connections (07 periods)

Types of welds and welded joints, advantages and disadvantages of welded joints design of fillet and butt weld. Plug and slot welds (Descriptive No numerical on plug and slot welds)

4. Tension Members (17 periods)

Analysis and design of single and double angle section tension members and their riveted and welded connections with gusset plate as per IS: 800

5. Compression Members (17 periods)

Analysis and design of single and double angle sections compression members (struts) and their riveted and welded connections with gusset plate as per BIS:800

6. Roof Trusses

(07 periods)

Form of trusses, pitch of roof truss, spacing of trusses, spacing of purlin, connection between purlin and roof covering. Connection between purlin and principal rafter (no design, only concept)

7. Columns

(11 periods)

7.1 Concept of buckling of columns, effective length and slenderness ratio, permissible stresses in compression as per IS:800 for different end conditions. Analysis and Design of axially loaded single section steel column

8. Beams

(11 periods)

Analysis and design of single section simply supported laterally restrained steel beams.

9. Fabrication and Erection of Steel Structures like trusses, columns and girders

(06 periods)

10 Masonry structures – Design of brick column and wall foundations

(06 periods)

Important Note:

Use of IS: 800 and Steel Tables are permitted in examination.

INSTRUCTIONAL STRATEGY

Teachers are expected to give simple problems for designing various steel structural members. For creating comprehension of the subject, teachers may prepare tutorial sheets, which may be given to the students for solving. It would be advantageous if students are taken at construction site to show fabrication and erection of steel structures. IS:800 may be referred along with code for relevant clauses

RECOMMENDED BOOKS

1. Duggal SK, "Design of Steel Structures" by Standard Publishers, Delhi
2. Birinder Singh, "Steel Structures Design and Drawing", Kaption Publishing House, Ludhiana
3. Ram Chandra, "Design of Steel Structures", Standard Publishers, Delhi
4. LS Negi, "Design of Steel Structure" Tata McGraw Hill, New Delhi

5. S. Ramamurthan, “Design of Steel Structures”,
6. Harbhajan Singh ,“Design and Drawing of Steel Structures” , Abhishek Publishing, Chandigarh
7. IS Code : 800-2007

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)

Total	96	100

EARTHQUAKE RESISTANT BUILDING CONSTRUCTION

Subject Code : 026002

L	T	P
5	-	-

RATIONAL

Diploma holders in civil engineering have to supervise construction of various earthquake resistant buildings. Therefore, the students should have requisite knowledge regarding terminology of earthquake and the precautions to be taken while constructing earthquake resistant buildings

DETAILED CONTENTS

1. Elements of Engineering Seismology (16 periods)

General features of tectonic of seismic regions. Causes of earthquakes, Seismic waves, earthquake size (magnitude and intensity), Epicentre, Seismograph, Classification of earthquakes, Seismic zoning map of India, Static and Dynamic Loading, Fundamental period.

2. Seismic Behaviour of Traditionally-Built Constructions of India

(12 periods)

Performance of building during earthquakes and Mode of failure (Out-of-plane failure, in-plane failure, Diaphragm failure, Connection failure, Non-structural components failure)

3. Special construction method, tips and precautions to be observed while planning, designing and construction of earthquake resistant building.

(10 periods)

4. Introduction to IS: 4326, IS: 13828, IS: 1893(Part 1), 154326 and IS: 13920 (latest)

(10 periods)

5. Seismic Provision of Strengthening and Retrofitting Measures for Traditionally-Built Constructions, Brick and RCC Structures

(10 periods)

6. Provision of reinforcement detailing in masonry and RC constructions

(10 periods)

7. Steel Building seismic design and detailing of steel building.

(06 periods)

8. Ductile detailing concept and general applications potentials

(06 periods)

INSTRUCTIONAL STRATEGY

The student may be taken for visit to various building construction sites where precautions related to earthquake resistant construction are being taken so that the students may appreciate the importance of the subject.

RECOMMENDED BOOKS

1. Elements of Earthquake Engineering by Jai Krishana and AR Chandersekaran; Sarita Parkashan, Meerut.
2. Manual Published by Earthquake Engineering department, IIT Roorkee / IIT Kanpur
3. IS 13920, IS: 13827, IS: 13828, IS 1893, IS 4326 (latest edition)
4. Singh, Harbhajan "Earthquake Resistant Building Construction" Abhishek Publishers, Chandigarh

CONSTRUCTION MANAGEMENT ACCOUNTS AND ENTREPRENEURSHIP DEVELOPMENT

Subject Code : 026001

L	T	P
5	-	-

RATIONALE

This is an applied civil engineering subject. The subject aims at imparting basic knowledge about construction planning and management, site organisation, construction labour, control of work progress, inspection and quality control, accidents and safety and accounts.

DETAILED CONTENTS THEORY

CONSTRUCTION MANAGEMENT

1. Introduction

(06 periods)

- 1.1 Significance of construction management
- 1.2 Main objectives of construction management and overview of the subject
- 1.3 Functions of construction management, planning, organising, staffing, directing, controlling and coordinating, meaning of each of these with respect to construction job.
- 1.4 Classification of construction into light, heavy and industrial construction
- 1.5 Stages in construction from conception to completion
- 1.6 The construction team: owner, engineer, architect and contractors, their functions and inter-relationship

2. Construction Planning

(10 periods)

- 2.1 Importance of construction planning
- 2.2 Stages of construction planning
 - Pre-tender stage
 - Contract stage
- 2.3 Scheduling construction works by bar charts
 - Definition of activity, identification of activities
 - Preparation of bar charts for simple construction work
 - Preparation of schedules for labour, materials, machinery and finances for small works
 - Limitations of bar charts

2.4 Scheduling by network techniques

- Introduction to network techniques; PERT and CPM, differences between PERT and CPM terminology

3. Organization

(06 periods)

Types of organizations: Line, line and staff, functional and their characteristics

4. Site Organization

(06 periods)

- 4.1 Principle of storing and stacking materials at site
- 4.2 Location of equipment
- 4.3 Preparation of actual job layout for a building
- 4.4 Organizing labour at site

5. Construction Labour

(04 periods)

- 5.1 Conditions of construction workers in India, wages paid to workers
- 5.2 Important provisions of the following Acts:
 - Labour Welfare Fund Act 1936 (as amended)
 - Payment of Wages Act 1936 (as amended)
 - Minimum Wages Act 1948 (as amended)

6. Control of Progress

(04 periods)

- 6.1 Methods of recording progress
- 6.2 Analysis of progress
- 6.3 Taking corrective actions keeping head office informed
- 6.4 Cost time optimization for simple jobs - Direct and indirect cost, variation with time, cost optimization

7. Inspection and Quality Control

(08 periods)

- 7.1 Need for inspection and quality control
- 7.2 Principles of inspection
- 7.3 Stages of inspection and quality control for
 - Earth work
 - Masonry
 - RCC
 - Sanitary and water supply services

8. Accidents and Safety in Construction

(08 periods)

8.1 Accidents – causes and remedies

8.2 Safety measures for

- Excavation work
- Drilling and blasting
- Hot bituminous works
- Scaffolding, ladders, form work
- Demolitions

8.3 Safety campaign and safety devices

ACCOUNTS

9. Public Work Accounts

(18 periods)

Introduction, technical sanction, administrative approval, allotment of funds, re-appropriation of funds bill, contractor ledger, measurement book running and final account bills complete, preparation of bill of quantities (BOQ), completion certificate & report, hand receipt, acquittance roll. Muster Roll labour, casual labour roll-duties and responsibility of different cadres, budget-stores, returns, account of stock, misc. P.W. advances T & P – verification, survey report, road metal material charged direct to works, account - expenditure & revenue head, remittance and deposit head, definition of cash, precaution in custody of cash book, imprest account, temporary advance, treasury challan, preparation of final bills. Students must learn to prepare accounts register, stock register.

10. Entrepreneurship Development

(10 periods)

10.1 Introduction

Entrepreneur-entrepreneurship, its meaning & importance. Qualities of an entrepreneur. Entrepreneur Motivation Training

10.2 Financing Agencies:

Financing agencies for land, infra structure, machinery, raw material, import of raw material and machinery. Role and function of Govt. department connected with the development of industries/business ventures in the State.

10.3 Industrial Legislation and taxes:

Industrial and labour laws, production tax, local tax, sales tax, excise duty and income tax.

10.4 Project Report

Component of project report – Land building, electricity, water, equipment and other utilities. Materials, its availability, cost, labour availability and wage rates. Project report preparation, provisional registration and plan of acquiring finance from proper source (financing agencies).

INSTRUCTIONAL STRATEGY

This is highly practice-based course and efforts should be made to relate process of teaching with direct experiences at work sites. Participation of students should be encouraged in imparting knowledge about this subject. To achieve this objective the students should be taken to different work sites for clear conception of particular topics, such as site organization, inspection of works at various stages of construction and working of earth moving equipment

RECOMMENDED BOOKS

1. Harpal Singh, "Construction Management and Accounts", Tata McGraw Hill Publishing Company., New Delhi
2. Peurifoy, RL, "Construction Planning, Equipment and Methods", McGraw Hill, Tokyo
3. Singh, Harbhajan " Construction Project Management" Abhishek Publishers, Chandigarh
4. Verma, Mahesh; "Construction Equipment and its Planning and Application
5. Dharwadker, PP; "Management in Construction Industry", , Oxford and IBH Publishing Company, New Delhi
6. Gahlot PS; Dhir, BM; "Construction Planning and Management", Wiley Eastern Limited, New Delhi
7. Softwares :
 - (a) MS Project – Microsoft USA
 - (b) Primavera

DISASTER MANAGEMENT

Subject Code : 026006

L	T	P
4	-	-

RATIONALE

The course is intended to provide a general concept in the dimensions of disasters caused by nature beyond the human control as well as the disasters and environmental hazards induced by human activities with emphasis on disaster preparedness, response and recovery.

DETAILED CONTENTS

- 1. Introduction (16 Periods)**
 - a) Natural Disaster: (Flood, Cyclone, Earthquakes, Landslides etc)
 - b) Man-made Disaster: Fire, Industrial Pollution, Nuclear Disaster, Biological Disasters, Accidents (Air, Sea, Rail & Road), Structural failures (Building and Bridges, War & Terrorism etc. Bridge),
 - c) Causes, effects and practical examples for all disasters.
- 2. Risk and Vulnerability Analysis (10 Periods)**
 - a) Risk : concept and analysis
 - b) Risk Reduction
 - c) Vulnerability : concept and analysis, Strategic Development for Vulnerability
- 3. Reduction Disaster Preparedness and Response (20 Periods)**

Preparedness -

 - a) Disaster Preparedness: Concept and Nature
 - b) Disaster Preparedness Plan
 - c) Prediction, Early Warnings and Safety Measures of Disaster.
 - d) Role of Information, Education, Communication, and Training
 - e) Role of Government, International and NGO Bodies.
 - f) Role of IT in Disaster Preparedness
 - g) Role of Engineers on Disaster Management.

Response-

 - a) Disaster Response : Introduction
 - b) Disaster Response Plan
 - c) Communication, Participation, and Activation of Emergency Preparedness Plan

- d) Search, Rescue, Evacuation and Logistic Management
- e) Role of Government, International and NGO Bodies
- f) Psychological Response and Management (Trauma, Stress, Rumor and Panic)
- g) Relief and Recovery
- h) Medical Health Response to Different Disasters

4. Rehabilitation, Reconstruction and Recovery (18 Periods)

- a) Reconstruction and Rehabilitation as a Means of Development.
- b) Damage Assessment
- c) Post Disaster effects and Remedial Measures.
- d) Creation of Long-term Job Opportunities and Livelihood Options,
- g) Disaster Resistant House Construction
- h) Sanitation and Hygiene
- i) Education and Awareness,
- j) Dealing with Victims' Psychology,
- k) Long-term Counter Disaster Planning
- l) Role of Educational Institute.

RECOMMENDED BOOKS

- 1 Dr. Mrinalini Pandey Disaster Management Wiley India Pvt. Ltd.
- 2 Tushar Bhattacharya Disaster Science and Management Mc Graw Hill Education (India) Pvt. Ltd.
- 3 Jagbir Singh Disaster Management : FutureK W Publishers Pvt. Ltd. Challenges and Opportunities
- 4 J. P. Singhal Disaster Management Laxmi Publications.
- 5 Shailesh Shukla, Shamna Biodiversity, Environment and Unique Publications Hussain Disaster Management
- 6 C. K. Rajan, Navale Earth and Atmospheric Disaster B.S. Publication Pandharinath Management : Nature and Manmade

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	16	25
2	10	16
3	20	31
4	18	28
Total	64	100

REPAIR AND REHABILITATION OF BUILDINGS

Subject Code : 026007

L	T	P
4	-	-

RATIONALE

One of the major concerns of a civil engineer is to take care of the building works, already constructed, in order to keep these buildings in utmost workable conditions. Usually it is being felt that the buildings deteriorate faster for want of care and proper maintenance. The buildings usually have a shabby appearance due to cracks, leakage from the roofs and sanitary/water supply fittings. Thus the need for teaching the subject in proper perspective has arisen making students aware of importance of repair and rehabilitation of buildings.

DETAILED CONTENTS

- 1. Need for Rehabilitation (09 periods)**
 - 1.1 Importance and significance of repair and rehabilitation of buildings
 - 1.2 Meaning of rehabilitation
 - 1.3 Objectives of rehabilitation
 - 1.4 Factors influencing the repair and rehabilitation
- 2. Agencies Causing Deterioration (Sources, Causes, Effects) (08 periods)**
 - 2.1 Definition of deterioration/decay
 - 2.2 Factors causing deterioration, their classification
 - 2.2.1 Human factors causing deterioration
 - 2.2.2 Chemical factors causing deterioration
 - 2.2.3 Environmental conditions causing deterioration
 - 2.2.4 Miscellaneous factors
 - 2.3 Effects of various agencies of deterioration on various building materials i.e. bricks, timber, concrete, paints, metals, plastics, stones
- 3. Investigation and Diagnosis of Defects (08 periods)**
 - 3.1 Systematic approach/procedure of investigation
 - 3.2 Sequence of detailed steps for diagnosis of building defects/problems
 - 3.3 List non - destructive and others tests on structural elements and materials to evaluate the condition of the building and study of three most commonly used tests.

4. Defects and their root causes

(09 periods)

- 4.1 Define defects in buildings
- 4.2 Classification of defects
- 4.3 Main causes of building defects in various building elements
 - 4.3.1 Foundations, basements and DPC
 - 4.3.2 Walls
 - 4.3.3 Column and Beams
 - 4.3.4 Roof and Terraces
 - 4.3.5 Joinery
 - 4.3.6 Decorative and protective finishes
 - 4.3.7 Services
 - 4.3.8 Defects caused by dampness

5. Materials for Repair, maintenance and protection

(09 periods)

- 5.1 Compatibility aspects of repair materials
- 5.2 State application of following materials in repairs:
 - 5.2.1 Anti corrosion coatings
 - 5.2.2 Adhesives/bonding aids
 - 5.2.3 Repair mortars
 - 5.2.4 Curing compounds
 - 5.2.5 Joints sealants
 - 5.2.6 Waterproofing systems for roofs
 - 5.2.7 Protective coatings

6. Remedial Measures for Building Defects

(21 periods)

- 6.1 Preventive maintenance considerations
- 6.2 Surface preparation techniques for repair
- 6.3 Crack repair methods
 - 6.3.1 Epoxy injection
 - 6.3.2 Grooving and sealing
 - 6.3.3 Stitching
 - 6.3.4 Adding reinforcement and grouting
 - 6.3.5 Flexible sealing by sealant
- 6.4 Repair of surface defects of concrete
 - 6.4.1 Bug holes

- 6.4.2 Form tie holes
- 6.4.3 Honey comb and larger voids
- 6.5 Repair of corrosion in RCC elements
 - 6.5.1 Steps in repairing
 - 6.5.2 Prevention of corrosion in reinforcement
- 6.6 Material placement techniques with sketches
 - 6.6.1 Pneumatically applied (The gunite techniques)
 - 6.6.2 Open top placement
 - 6.6.3 Pouring from the top to repair bottom face
 - 6.6.4 Birds mouth
 - 6.6.5 Dry packing
 - 6.6.6 Form and pump
 - 6.6.7 Preplaced – aggregate concrete
 - 6.6.8 Trowel applied method
- 6.7 Repair of DPC against Rising Dampness
 - 6.7.1 Physical methods
 - 6.7.2 Electrical methods
 - 6.7.3 Chemical methods
- 6.8 Repair of walls
 - 6.8.1 Repair of mortar joints against leakage
 - 6.8.2 Efflorescence removal
- 6.9 Waterproofing of wet areas and roofs
 - 6.9.1 Water proofing of wet areas
 - 6.9.2 Water proofing of flat RCC roofs
 - 6.9.3 Various water proofing systems and their characteristics
- 6.10 Repair of joints in buildings
 - 6.10.1 Types of sealing joints with different types of sealants
 - 6.10.2 Techniques for repair of joints
 - 6.10.3 Repair of overhead and underground water tanks

INSTRUCTIONAL STRATEGY

This is very important course and efforts should be made to find damaged/defective work spots and students should be asked to think about rectifying/finding solution to the problem. Visits to work site, where repair and rehabilitation activities are in progress can be very useful to students. The students will also prepare a project report based upon the available water proofing materials, sealant, special concrete for repair and adhesives and other repair material available in the market.

INSTRUCTIONAL STRATEGY

This is very important course and efforts should be made to find damaged/defective work spots and students should be asked to think about rectifying/finding solution to the problem. Visits to work site, where repair and rehabilitation activities are in progress can be very useful to students. The students will also prepare a project report based upon the available water proofing materials, sealant, special concrete for repair and adhesives and other repair material available in the market.

RECOMMENDED BOOKS

1. Gahlot P.S. and Sanjay Sharma, "Building Defects and Maintenance Management", CBS Publishers, New Delhi
2. Nayak, BS, "Maintenance Engineering for Civil Engineers", Khanna Publishers, Delhi
3. Ransom, WH "Building Failures - Diagnosis and Avoidance", Publishing E and F.N. Span

STRUCTURAL DRAWINGS

Subject Code : 026004

L	T	P
-	-	8

RATIONALE

Diploma holders in Civil Engineering are required to supervise the construction of RC and steel structures. Thus one should be able to read and interpret structural drawings of RC and steel structures. The competence to read and interpret structural drawings is best learnt by being able to draw these drawings. Hence there is a need to have a subject devoted to preparation of structural drawings.

DETAILED CONTENTS

PART A

Drawing Exercises

1. RC Structures:

Reinforcement details from the given data for the following structural elements with bar bending schedules

- (i) Drawing No. 1: RC Slabs - One way slab and Two way slab.
- (ii) Drawing No.2 : Beams - Singly and doubly reinforced rectangular beams and Cantilever beam (All beams with vertical stirrups)
- (iii) Drawing No.3 : Columns and Footings – Square, Rectangular and Circular Columns with lateral ties and their isolated sloped column footings.
- (iv) Drawing No. 4 : Portal Frame – Three bay two storey RC portal frame with blow up of column beam junctions.
- (v) Drawing No.5: Dog legged stairs for single storey building
- (vi) Drawing No.6 : Draw atleast one sheet using CAD software

PART B

2. Steel Structures:

Structural drawing from given data for following steel structural elements.

- (i) Drawing No. 1: Roof Truss – Drawing of Fink Roof Truss with details of joints, fixing details of purlins and roof sheets.
- (ii) Drawing No.2 : Column and Column Bases - Drawing of splicing of steel columns. Drawings of slab base, gusseted base and grillage base for single section steel columns.

- (iii) Drawing No.3 : Column Beam Connections
 - (a) Sealed and Framed Beam to Beam Connections
 - (b) Sealed and Framed beam o Column Connections
- (iv) Drawing No. 4 : Plate Girder
 - Plan and Elevation of Plate Girder with details at supports and connection of stiffness, flange angles and cover plate with web highlighting curtailment of plates.
- (v) Drawing No. 5 : Draw atleast one sheet using CAD software

RECOMMENDED BOOKS

1. Loyal JS “Civil Engineering Drawing”, Satya Parkashan, New Delhi
2. Chandel RP “ Civil Engineering Drawings”
3. Kumar; NS “ Civil Engineering Drawing “ IPH, New Delhi
4. Malik RS and Meo GA, “Civil Engineering Drawing” Asian Publishing House, New Delhi
5. Singh, Birinder “RCC Design and Drawing” Kaption Publishing House, New Delhi.
6. Singh, Birinder “Steel Structures Design and Drawing”, Kaption Publishing House, New Delhi
7. Singh, Harbhajan, “Structural Drawings”, Abhishek Publishers, Chandigarh
8. B.V. Sikka, Civil Engineering Drawing.

MAJOR PROJECT WORK

Subject Code : 026008

L	T	P
-	-	8

As far as possible students should be given live project problems with a view to :

- i) Develop understanding regarding the size and scale of operations and nature of field work in which students are going to play their role after completing the courses of study.
- ii) Develop understanding of subject based knowledge given in the classroom in the context of its application at work places.
- iii) Provide first hand experience to develop confidence amongst the students to enable them to use and apply classroom based knowledge and skills to solve practical problems of the world of work.
- iv) Develop special skills and abilities like interpersonal skills, communication skills, attitudes and values.

For the fulfillment of above objectives, polytechnics may establish close linkage with 8-10 relevant organization for providing such an experience. It is necessary that each organization is visited well in advance by respective teachers and activities to be performed by students are well defined. The chosen activities should be such which are of curricular interest to students and of professional value to industrial/field organizations. Each teacher is expected to supervise and guide 5 - 6 students.

Effort should be made to identify actual field problems to be given as project work to the students. Project selected should not be too complex which is beyond the comprehension level of the students. The placement of the students for such a practical cum project work should match with the competency profile and interest of students. Students may be assessed both by industry and polytechnic faculty. The suggested performance criteria is given below:

- | | |
|---|----|
| a) Punctuality and regularity | 10 |
| b) Initiative in learning/working at site | 10 |
| c) Level/proficiency of practical skills acquired | 10 |
| d) Sense of responsibility | 10 |
| e) Self expression/Communication skills | 10 |
| f) Interpersonal skills | 10 |

g) Report writing skills	20
h) Viva voce	20

Some of suggested projects are given below: These are only guidelines, teacher may take any project related to Civil Engineering depending upon the availability of projects. Preference should be given to practical oriented projects.

According to the need of the polytechnic, the following major projects are suggested:

1. Construction of a small concrete road consisting of following activities
 - Survey and preparation of site plan
 - Preparation of drawings i.e. L-Section and X-Section
 - Estimating earth work
 - Preparation of sub grade with stone ballast
 - Laying of concrete
 - Testing of slump, casting of cubes and testing
 - Material estimating and costing with specifications
 - Technical report writing
2. Water Supply system for a one or two villages
 - Surveying
 - Design of water requirements and water distribution system
 - Preparation of drawing of overhead tank
 - Material estimating and costing
 - Specifications
 - Technical report writing
3. Construction of seating benches in polytechnic campus
4. Welding of angle iron and Expanded metal jali to prepare fencing in polytechnic campus
5. Construction of toilets and baths for a shopping complex in a township
6. Construction of bridal path 4 kms long
7. Construction of shopping complex by detailing of RCC drawings, estimating and costing of material
8. Rainwater harvesting
 - Assessment of catchment's area
 - Intensity of rainfall
 - Collection of water

- Soak pit design
 - Supply of water
 - Monitoring during rainy season
9. Design and construction of septic tank with soak pit for 100 users
 10. Preparing plumbing detailed drawings of a two storey building and material estimate and costing
 11. Planning and design of sports stadium in a township or cluster of villages
 12. Design of small residential building including structural members, specifications, estimating and costing of materials, report writing and municipal drawings for water supply and sewerage system
 13. Concrete Mix Design
 14. Construction of concrete cubes by mixing appropriate quantity of fly ash with fibres
 - (i) the fibres like polypropylene, carbon, steel etc. can be used
 - (ii) students will show the comparison between concrete mixed with fibres verses the quality controlled concrete.
 15. Estimation and designing of Highway Road
 - (i) Reconnaissance survey of proposed road
 - (ii) To take L - section and cross sections
 - (iii) Fixing of grades
 - (iv) Estimation of cutting and filling of earth mass
 - (v) Plane tabling survey of proposed road
 - (vi) Estimation of proposed road
 16. Designing a small height gravity dam
 - (i) Constructing of catchment area
 - (ii) Calculating the reservoir capacity
 - (iii) Designing of gravity dam by taking into account various forces
 17. Designing of ferro-cement water tank and toilet. Testing of the ferro-cement products in civil engineering labs.

Note: The projects undertaken should be field oriented

SURVEY CAMP

Subject Code : 026005

10 Days Duration

Purpose

- a) Making the students conversant with the camp life
- b) Providing an opportunity to the students to develop team spirit
- c) Training the students to communicate with the local population
- d) To impart intensive training in the use of all surveying instruments viz Theodolite, Dumpy level, Compass, tachometer etc.
- e) To train the students to appreciate practical difficulties in surveying on the field
- f) To train the students for self management

Task:

Preparation of topographical plan of a given area. The survey camp will be organized for a duration of 10 days time span. The students may be assigned an undulated area of about 1.5 to 2.00 sq.km. with level difference of 15m consisting of good number of physical features such as buildings, roads, bridges, culverts, railway tracks, electric lines etc. They are required to prepare the topographic map of above areas showing various features along with contours using suitable contour intervals. They will mark a road alignment of given gradient connecting any two stations on the map consisting some horizontal and vertical curves and will prepare estimate of earthwork and submit the detailed technical report indicating therein practical difficulties faced during surveying for the features like ridge, line, valley lines, saddle cliffs etc.

The students should be divided in the groups consisting of 5-7 in numbers. They are required to submit the Report of work done, during survey camp, which will be duly examined, while awarding the internal assessment.

EMPLOYABILITY SKILLS

Subject Code : 016055

L	T	P
4	-	-

RATIONALE

Diploma holders are required to not only possess subject related knowledge but also soft skills to get good jobs and to rise steadily at their workplace. This subject is included to develop employability skills amongst the students.

DETAILED CONTENTS

Unit I: (06 periods)

- Technical Education & Industrial scenario.
- Competency required of an engineer.

Unit II: (06 periods)

- Professional Engineer desirable values and ethics and their development.
- Relation between engineering profession, society and environment

Unit III: (12 periods)

Effective Communication

- Reading & Active Listening Skills
- Speaking
- Writing
- Presentation Technique/Seminar
- Group discussion

Unit IV: (12 periods)

Managing project

- Leadership
- Motivation
- Time management
- Resource management
- Interpersonal relationship

Unit V: (10 periods)

Preparing for Employment

- Searching for job/job hunting

- Resume & CV Writing
- Interview technique in personal interview telephonic interview, panel
- Interview, group interview, video conferencing

Unit VI:

(08 periods)

Self Management

- Self awareness
- Stress Management
- Conflict resolution

Unit VII:

(06 periods)

- Creativity, Innovation and Intellectual property right
- Concept and need in present time for an engineer

Unit VIII:

(04 periods)

Rules & Ethics

- Basic rules, laws and norms to be adhered by engineers during their working

LIST OF PRACTICAS

- Steps how to effectively write different types of Letters.
- Steps to make a Presentation in Power Point.
- Steps to make a Resume more effective.
- Steps to conduct Telephonic/On-line Interview (Through skype/Google Hangout).
- Study of Different Techniques of Stress Management.
- Study of Rules & Ethical practices to be followed at Workplace.

RECOMMENDED BOOKS

- Employability skills by Kapil Dev, Vishnu P. Singh Asian Pub. New Delhi
- Employability skills for Diploma students by Dr. S.K. Singh, Vayu Education, New Delhi

SUGGESTED DISTRIBUTION OF MARKS

Unit No.	Time Allotted (Periods)	Marks Allotted(%)
1	06	10
2	06	10
3	12	18
4	12	18
5	10	16
6	08	12
7	06	10
8	04	6
total	64	100

LEARNING OUT COMES

BRANCH NAME - CIVIL ENGINEERING

SEMESTER - VI

S.No.	Title of Subject/Unit	Learning Outcomes	Means of Assessment
1	Steel Structure Design	At the end of the course, the student will be able to understand the properties of structural steel and design simple steel structural elements like tension members, compression members, columns, beams etc. by using IS 800	Assignments, Quizzes, Seminars, Class Test, Power Point Presentation, Mid Term Examination & Semester examination.
2	Earthquake Resistant Building Construction	At the end of the course, the student will be able to understand the terminology of earthquake along with the technical knowhow of earthquake resistant building construction	Assignments, Quizzes, Seminars, Class Test, Power Point Presentation, Mid Term Examination & Semester examination. Practical assessment is done through practical test results, practical files and Viva voce.
3	Construction Management Accounts & Entrepreneurship Development	At the end of the course, the student will be able to understand the various objectives and functions of construction planning and management, prepare bar charts for scheduling construction works, control of work progress, inspection and quality control along with safety parameters.	Assignments, Quizzes, Seminars, Class Test, Power Point Presentation, Mid Term Examination & Semester examination.
4	Disaster Management	At the end of the course, the student will be able to understand the general concept in the dimensions of disasters caused by nature beyond the human control. Student will be able to understand the rehabilitation, reconstruction & recovery measures post disaster.	Assignments, Quizzes, Seminars, Class Test, Power Point Presentation, Mid Term Examination & Semester examination.

5	Repair and Rehabilitation of Buildings	At the end of the course, the student will be able to assess the various sources, causes & effects of deterioration of buildings and other structures. Student will be able to provide remedial measures for building defects including rehabilitation of buildings.	Assignments, Quizzes, Seminars, Class Test, Power Point Presentation, Mid Term Examination & Semester examination.
6	Structural Drawing	At the end of the course, the student will be able to prepare, read and interpret various drawings of RCC and steel structures. Student will be able to prepare and read Bar Bending Schedule & calculate the material requirements for execution of different civil works.	Assignments/ Drawing Sheets, Seminars, Class Test, Power Point Presentation, Mid Term Examination, Viva voce & Semester examination.
7	Major Project Work	At the end of the course the student will be able to understand the nature of field work including development of interpersonal and communication skills.	Assignments, Synopsis, Power Point Presentation, Report writing including maps/drawing sheets, Viva voce & Project Report.
8	Survey Camp	At the end of the camp the student will be conversant with the camp life, develop team spirit, use of various surveying instruments in the field & solving practical difficulties.	Survey camp will be held after 5th semester of minimum 10 days and its evaluation will be done in 6th semester through Report and Viva-voce.
